Subject: Re: whats with the new kernel bugs...
Posted by kir on Tue, 18 Jul 2006 18:00:53 GMT

We have issued the update (026test015.2) fixing the first bug (the one that was fixed in 2.6.17.4 and 2.6.16.24), but the second bug is not fixed; it will be fixed in 026test016 or *017.

Looks like the stable kernel is not vulnerable.
