Subject: Re: ovzkernel-2.6.18-308.el5.028stab099.3 + vzctl-3.2-1 = problems "detected vswap CT config bu
Posted by umask on Sat, 05 May 2012 05:29:36 GMT

I think that:
1. vzctl needs to report that problem here is in missed parameter (physpages), not vswap (before write to forum and report bug I googled problem and find nothing).
2. due to compatibility vzctl must report warnings few minor versions and only after will exit with fatal error.

Currently I have more than 20 servers with described problem.
Possible other users have the same misconfigurations.
