This patch set is the back-port of "SUNRPC: separate per-net data creation from service" patch set and "NFS: hard-code init_net for NFS callback transports" patch for 3.5 kernel.

It fixes NULL pointer dereference in svc_destroy(), reported by Dave Jones in "3.4. sunrpc oops during shutdown" e-mail.

The following series implements...

Stanislav Kinsbursky (2):

SUNRPC: new svc_bind() routine introduced

SUNRPC: move per-net operations from svc_destroy()
