Subject: vzctl console how to?
Posted by mustardman on Sun, 03 Jun 2012 19:09:50 GMT

Can anyone explain how to use the new vzctl console feature. There doesn't seem to be any documentation on it. The only posts from developers say that the command is vzctl attach CTID but that does not work. So through trial and error I seem to have figured out they changed it to vzctl console but not a single mention of it anywhere as far as I can tell.

Once I run it I can't get out with ESC like the vzctl attach posts say. So I really don't know what it's supposed to do and how to use it.
