Thanks for your answer i m using a shorwall firewall i have this in my default policy, my Host is fw

all DROP info net **ACCEPT** fw all **ACCEPT** loc all ACCEPT# loc venet venet all ACCEPT all all REJECT info

And it doesn't work.

But if i replace the last line with all ACCEPT it work. but this rule is very permissive

i triyed many combination ... no good result!

Perhaps the problem is that venet0 isn't a real ethernet interface? so we can't do this simply ...

Thanks.
