
Subject: yum error trying to update vzctl

Trying to run a 'yum update' I got some strange yum error. I narrowed it down to being caused by vzctl. It installed fine on another very similar server so it seems something has gone belly up on this server, not sure what though.

During the failure it suggests running "yum --enablerepo=openvz-utils clean metadata" so I start by doing that:

```
# yum --enablerepo=openvz-utils clean metadata
```

```
Loaded plugins: presto
```

```
Cleaning repos: openvz-kernel-rhel6 openvz-utils rpmforge sl sl-security
```

```
15 metadata files removed
```

```
5 sqlite files removed
```

```
0 metadata files removed
```

```
# yum update vzctl
```

```
Loaded plugins: presto
```

```

Trying other mirror.

(1/2): vzctl-3.3-1.x86_64.rpm

| 228 kB 00:01

http://ftp.iij.ad.jp/pub/openvz/current/vzctl-3.3-1.x86_64.rpm: [Errno -1]

Package does not match intended download. Suggestion: run yum

--enablerepo=openvz-utils clean metadata

Trying other mirror.

After this it just keeps looping through mirrors.

What does this error mean? This server runs Centos 6-64 so it should be the correct rpm.
