View Forum Message <> Reply to Message

Hello,

I was installing openvz via HyperVM but I have noticed that it is the same when I like to do it via command line.

(yum clean all is performed as you can see, server is
clean after installation centos 5.8 x64)

```
[root@h159 ~]# yum clean all
Loaded plugins: fastestmirror, security
Cleaning up Everything
Cleaning up list of fastest mirrors
[root@h159 ~]# yum -y install vzctl
Loaded plugins: fastestmirror, security
Determining fastest mirrors

http://openvz-mirror1.rapidvps.com/current/vzctl-3.3-1.i386.rpm: [Errno 4] Socket Error: (11, 'Resource temporarily unavailable')
Trying other mirror.

There are only errors with report:
Package does not match intended download
Trying other mirror

Are the openvz mirrors out of sync? I can install without the problem other Centos packages.
