vass wrote on Sat, 22 July 2006 00:51 Yes, it's possible.  
Here is an exampe of template creation using this way:  
[http://forum.openvz.org/index.php?t=post&reply\\_to=4710&a mp;a mp;](http://forum.openvz.org/index.php?t=post&reply_to=4710&a mp;a mp;)

Ok i got the right link. But that's a handful, and anyway, what i gather from the link is that, if i have to create a template from an already running vps, all i need to do is:

```
tar -czf vps-template.tgz /vz/private/101
```

Is that right?

Thanks a lot for your time.
