Next funny thing is, I've now that the limit to 2GB eg 524288 pages. And the system is using only 70MB of RAM:

free

	total	used	free	shared	buffers	cached
Mem:	2097152	69332	2027820	0	0	0
-/+ buffers/cache:		69332	2027820			
Swap:	0	0	0			

I'm using the new 2.6.16 kernel with meminfo support.
