Ok found the solution, apparently, commenting SWAPPAGES or removing it
from the config makes the CT to have access to the whole swap of the
HN.

Which is different from setting it to "unlimited". Strange, but it works...

"In July 2005, after several failed attempts to legalise software
patents in Europe, the patent establishment changed its strategy.
Instead of explicitly seeking to sanction the patentability of
software, they are now seeking to create a central European patent
court, which would establish and enforce patentability rules in their
favor, without any possibility of correction by competing courts or
democratically elected legislators."
