Subject: Re: Ploop optimized for SSDs?
Posted by ktwalrus on Wed, 10 Oct 2012 23:52:43 GMT

Anyone know the answers to these questions?

I see that ploop 1.5 has been released, but the warning not to use it in production is still in place. Any idea how much longer until there is confidence in production use?

I mainly want to use ploop for mysql db, including the ability to snapshot the database.
