jbond007 wrote on Thu, 09 March 2006 01:19: the vps leak memory have 3 gb ram and run 3 vps

RAM Total Used Free
2.97 GB 2.48 GB 496.24 MB

how clean the buffer or ram or another solution
my vps run debian
my host run centos 4.2
Thank you

without reboot the system !

dude, you're really stupid and annoying, please leave developers alone and try read some books.
