
Subject: [PATCH v6 09/10] IPC: message queue copy feature introduced
Posted by [Stanislav Kinsbursky](#) on Mon, 15 Oct 2012 16:00:22 GMT
[View Forum Message](#) <> [Reply to Message](#)

This patch is required for checkpoint/restore in userspace.

IOW, c/r requires some way to get all pending IPC messages without deleting them from the queue (checkpoint can fail and in this case tasks will be resumed, so queue have to be valid).

To achive this, new operation flag MSG_COPY for sys_msgrcv() system call was introduced. If this flag was specified, then mtype is interpreted as number of the message to copy.

If MSG_COPY is set, then kernel will allocate dummy message with passed size, and then use new copy_msg() helper function to copy desired message (instead of unlinking it from the queue).

Notes:

1) Return -ENOSYS if MSG_COPY is specified, but CONFIG_CHECKPOINT_RESTORE is not set.

Signed-off-by: Stanislav Kinsbursky <skinsbursky@parallels.com>
