---

Same errors also here, around 2 times a day.

2 system hangs in about 1 month, dont no if it is related to this error, because i need to reset the server

(not reponding on anything / blank screen / network down)

Is it possible to add a fix in openvz kernel?

perhaps: [h\\_t\\_t\\_p\\_s://lkml.org/lkml/2007/5/22/35](http://lkml.org/lkml/2007/5/22/35) is related ??

Using kernel 2.6.32-042stab065.3

Regards,

Marco
