---

Hello,

I am facing following error while migrating a VE from centos 4 hardware node to centos 6 hardware node.

=====

1360144746: bash: /usr/sbin/vzmdest: No such file or directory

1360144746:

1360144746: Can't init migrate : seems you need install migrate package on destination HN

=====

Upon checking further I could see that the binary /usr/sbin/vzmdest is not exists in centos 6 node.  
Please update me is it possible to use "vzmigrate" utility in centos 4 to 6 migration
