Hi there!

i have a kernel crash on my openvz host. "its freezing" and i need to reboot the machine then everything comes back online again.

when i look into the messages file i get this information:

Mar 3 23:14:42 sol last message repeated 4 times

Mar 4 00:16:08 sol kernel: list_add corruption. prev->next should be ffff81062dd993b8, but was 2065756c61762e78

Mar 4 00:16:08 sol kernel: ----- [cut here] ----- [please bite here] -----

Mar 4 00:16:08 sol kernel: Kernel BUG at lib/list_debug.c:31

Tanks for help!

Egner
