I see two repository sites:

<http://download.openvz.org/debian/>

<http://download.openvz.org/debian-systs/>

But there aren't packages for Squeeze (Debian 6) nor Wheezy (Debian 7).

I'm using Debian 6 hosts for OpenVZ, but source OpenVZ updates aren't included on Debian mainline repositories. Is there some other URL with updated OpenVZ packages for Debian GNU/Linux 6.0 ?
