Subject: Re: Kernel Repo changed?
Posted by pmaco on Thu, 04 Apr 2013 08:47:28 GMT

We run a local repo, and this is the URL we have for the openvz kernels:
download.openvz.org/kernel/rhel5/

I know this doesn't work, as I can't browse this URL.

However, we had the Openvz kernel updates recently.

I'm trying to find out how we were able to get these updates to our local repo if the URL is wrong.
