Subject: Re: vps doesn't work after migration (tar.gz migration actually) Posted by hello-world on Sat, 05 Aug 2006 22:14:57 GMT View Forum Message <> Reply to Message

Sorry people. My mistake. i was using zip instead of tar actually, since i am basically from windows world. And it appears zip just ignores unix special files. Anyway, is there any way i can create the dev entries? For the present, i just copied the dev entries from another vps and it works beautifully.
