marksy wrote on Mon, 24 June 2013 18:56 For anyone who may come across this thread - I'll assume ploop uptake is non-existent based on the lack of interest in this thread, perhaps for good reason. We'll head down the KVM path and update with our experience.

Ploop is still experimental, although I find it very interesting. Judging from the occasional posts on the forum and in the mailing list, I'm sure it has some users already.

Anyway, why do say "perhaps for a good reason", any actual reason for that?
