I don't know anything about altlinux (which distro based it is?), but at least your vzctl version is old, latest version is 4.4.

probably kernel also needs to be updated.

I recommend to use rhel based latest stable kernel (version 042stab079.5 at the moment)

for debian there is article how to use rhel based kernels and tools:

http://wiki.openvz.org/Install_kernel_from_RPM_on_Debian_6.0

also please tell what os you use in CTs
