Hi,

I was startng a Vps hosting company and couldnt find a user based panel anywhere, so i coded my own using the ZPanel Backend.

This panel works very well so far, If your interested in it visit

http://www.thezpanel.com/forums/viewtopic.php?f=10&t=277_2&p=18438#p18438

We have coded more, we jare going to update the screenshots!

Please give me some feedback on The Zpanel forums and / or on OpenVZ forums.

Would anybody like to use this panel free?
