Subject: OpenVZ VPS installing failure Posted by sarh877 on Mon, 21 Oct 2013 00:03:47 GMT

View Forum Message <> Reply to Message

Hi all,

I am running Ubuntu 10.04 on my HP server, after the OpenVZ kernel is running on Ubuntu 10.04. Then I tried to install VPS on it, but I always get this error message, and after that, the server is frozen and I have to hard restart the server again.

Pls check the error in attach file.

Thanks so much!
