Hello !

Thank you, it was it !

I didn't even try to put quotes because nothing is mentionned about it in the doc/man, and basic commands (such as ls, cat, etc.) work fine without.

I will know that now !

So, issue resolved

Have a good day !

Rémi

ps : I'm not sure but I think there isn't a "solved" option for OP in this forum, or I didn't find it. If I am wrong, please tell me and I will change the status !
