Hi,

I'm new here, I have a hosting company and one of my openvz servers is showing the following error and I haven't been able to get around it.

Would appreciate your help.

while running yum update I get the following at the end:

--> Finished Dependency Resolution

Error: Package: kernel-2.6.32-358.23.2.el6.x86_64 (updates)

You could try using --skip-broken to work around the problem

You could try running: rpm -Va --nofiles --nodigest

How can I get it to actually apply the update without getting this error?

This is a CentOS 6.4
