grep wrote on Wed, 20 November 2013 12:43Hello,

dont add your internet IP to the rules. I was thinking you use openvpn.

Please make:

```
iptables -t nat -A POSTROUTING -j SNAT --to-source SERVERIP
```

Serverip is the IP of your server, not of your internet. Insert the IP of your openvz container.

```
Chain PREROUTING (policy ACCEPT)
```

```
target    prot opt source          destination
```

```
Chain POSTROUTING (policy ACCEPT)
```

```
target    prot opt source          destination
```

```
SNAT      all  -- anywhere        anywhere        to:IP_of_VPN
```

```
Chain OUTPUT (policy ACCEPT)
```

```
target    prot opt source          destination
```

still not going
