---

Distribution : centos 6.4  
Kernel 2.6.32-042stab083.2 on an x86\_64  
the vzctl version: vzctl-core-4.6.1-1.x86\_64  
                  vzctl-4.6.1-1.x86\_64

i don't know what the ploom version is.  
the file system for the /vz is ext4  
my server console is now showing a strange error it doesn't seem to effect anything though. I've added an image to the post.
