hill3788 wrote on Mon, 13 January 2014 09:13 This is what I see:

```
101  2  20 72.191.141.85 192.168.0.77
```

This means you've entered your VM successfully. The prompt didn't change because you most likely use the same hostname for the HN and the VM, thus causing the confusion.

Quote: This is all new to me - What should the IP addresses be?

Do I need a DNS Server?

IPs you see are the ones assigned to your VM. If you have internet connectivity then you most likely have DNS properly set up, as far as resolving goes.
