I also have a similar motherboard (Intel Server board),
it runs RHEL 6.3, the attached 82574L will crash the server (probably under high network traffic
load).

You may try to apply some ROM patch
http://sourceforge.net/projects/e1000/files/e1000e%20stable/ eeprom_fix_82574_or_82583/

But my final solution: use 82579?? for high traffic NIC instead.
