Subject: Re: How to connect container ssh or ftp Posted by spoke2u on Mon, 10 Feb 2014 18:46:11 GMT View Forum Message <> Reply to Message

I am unsure if this helps but for some reason I have been unable to connect using wireless devices to my containers. via ssh. I think I narrowed it down to they all share the same mac address. I can connect fine via my standard workstation wired computer running linux debian.

I have been trying a way to give each container its own mac address. If this at all helps or if I wam way off please let me know thanks
