Subject: Which fles contains IPs?
Posted by postcd on Fri, 28 Feb 2014 01:08:00 GMT

Hello,

after migrating VM to a new server, which linux files i need to edit so everything like websites start working?

i see

/etc/hosts
/etc/sysconfig/network-scripts/ifcfg-venet0:0
/var/named/chroot/var/named/domainname.com

are one where old IP remains
