Subject: Re: /vz/root and /vz/private,double space?
Posted by Paparaciz on Sat, 01 Mar 2014 07:52:59 GMT

when you start ct openvz mounts bind /vz/private/CTID to /vz/root/CTID

if you want backup, move you have to do so with /vz/private/CTID

p.s. I repeat- read wiki, documentation, forum to find answers to such simple questions. don't spam forum.
