postcd wrote on Tue, 11 March 2014 18:42So it is technically impossible to prevent data loss on OpenVZ?

I did not listen that there was ever an data loss on shared hosting because of insufficient memory, so on OpenVZ data loss can happen anytime if memory usage reach 100%? i never thought this system is so bad..

openvz doesn't have any problems about this.

btw there is not only memory usage
