Subject: Re: After boot from OpenVZ kernel, server stuck
Posted by Ales on Thu, 27 Mar 2014 23:38:47 GMT

It's hard to help you as you're not giving us much information to go on.

Which vzkernel version is failing at boot? What hardware, which network card?

Is an older vzkernel booting normally? How about a stock OS kernel? If so, which ones?

What do you see in the boot logs when the failure occurs?
