Subject: Repo Error: All mirror URLs are not using ftp, http[s] or file
Posted by sreeninair on Sat, 05 Apr 2014 21:12:22 GMT

Hello,

I am getting the following error while updating or listing yum. Please let me know how to fix this.

================

root@server [/etc/yum.repos.d]# yum list all
Loaded plugins: fastestmirror
Loading mirror speeds from cached hostfile
YumRepo Error: All mirror URLs are not using ftp, http[s] or file.
Eg. $releasever is not a valid release or hasnt been released yet/
YumRepo Error: All mirror URLs are not using ftp, http[s] or file.
Eg. $releasever is not a valid release or hasnt been released yet/
removing mirrorlist with no valid mirrors: /var/cache/yum/extras/mirrorlist.txt
Error: Cannot find a valid baseurl for repo: extras
===============

network seems fine, the server is using centos 5.10 32 bit os. I have copied yum.conf,
yum.repos.d from another working server. Still getting same error.
