Hy,

with the recent update of the vzkernel to 2.6.32-042stab088.4 on centos 6.5 iptables's nat stopped working.

this is what I get when i try to start iptables

```
iptables: Setting chains to policy ACCEPT: filter      [ OK ]  
iptables: Flushing firewall rules:                    [ OK ]  
iptables: Applying firewall rules: iptables-restore v1.4.7: iptables-restore: unable to initialize table  
'nat'
```

Error occurred at line: 3

Try `iptables-restore -h' or 'iptables-restore --help' for more information.
