I don't know how much solusvm supports ploop.  
can you tell which vzctl version you are using?

main problem I think is:

2014-05-30T03:06:45-0400 vzctl : CT 105 : Can't load ploop library: libploop.so: cannot open  
shared object file: No such file or directory

2014-05-30T03:06:45-0400 vzctl : CT 105 : Please install ploop packages!

did you installed ploop packages?

if solusvm doesn't have ploop support, and you have recent version of vzctl than you might  
change default VE\_LAYOUT in:

/etc/vz/vz.conf

to:

## Filesystem layout for new CTs: either simfs (default) or ploop

VE\_LAYOUT=simfs
