## Subject: Disk usage with plop. [SOLVED] Posted by piplite on Fri, 06 Jun 2014 16:20:36 GMT

View Forum Message <> Reply to Message

2.6.32-042stab088.4 vzctl version 4.7.2

The issue is this.

VE was converted from simfs to ploop.

I get

root@server1:/# df -h

Filesystem Size Used Avail Use% Mounted on

/dev/simfs 9.9G 4.5G 5.4G 45% / tmpfs 2.0M 0 2.0M 0% /lib/init/rw tmpfs 1.0G 0 1.0G 0% /dev/shm

But

/vz/private/505 # du -sh \*

38G root.hdd

4.0K Snapshots.xml

There are no snapshots but VE root.hdd for some reason takes up 38 gig instead of 5-10. What could be wrong and how to bring it down in size?

Thank you.
