Subject: OVZ does not delete root and private directores in some cases
Posted by o1o1o11o1 on Fri, 27 Jun 2014 15:43:57 GMT

Hey guys,

OS:
Distributor ID: Debian
Description: Debian GNU/Linux 7.5 (wheezy)
Release: 7.5
Codename: wheezy

Kernel:
2.6.32-openvz-042stab084.17-amd64

VZ:
vzctl 4.7.2-1

In some cases the /var/lib/vz/root/$CTID and the /var/lib/vz/private/$CTID directories are not being removed after an instance has been destroyed, No errors in the vzctl.log to indicate any reason for this. It does not happen always but probably about 40% of the time.

Not sure if anyone else has seen this behavior and if this is a bug or not.
