Subject: large ploop files (worried about corruption)

Hello,

I am planning to convert some simfs to ploop.

The simfs are from 100GB to 500GB.

Will these work as ploop?

Do I need to worry about corruption? I'm afraid that any physical disk issue might cause the whole ploop file image to be unreadable. With simfs any disk issue would be local to a few files in the best case.

Thanks for your advice!
