Subject: Re: large ploop files (worried about corruption)
Posted by vmvmvm on Thu, 10 Jul 2014 19:26:17 GMT

Hi,

Thanks for your reply.

Regarding the ploop images - I may have a technical mis-understanding. My fear is that if a few bytes of the image are corrupted, the entire file system would become bad?

I am no doubt moving to ploop - there are many advantages. Just a bit paranoid about moving really large filesystems to it.

Thanks again!
