Subject: Re: vzctl start failed
Posted by kir on Tue, 14 Oct 2014 10:35:08 GMT

29300 statfs("/proc", 0x7fff712925d0)   = -1 ENOENT (No such file or directory)
29300 write(2, "statfs on /proc failed", 22) = -1 EBADF (Bad file descriptor)
29300 write(2, ": No such file or directory", 27) = -1 EBADF (Bad file descriptor)
29300 write(2, "\n", 1)   = -1 EBADF (Bad file descriptor)

but the messages are not shown because stderr is already closed.

Will try to fix it.
