Hello all the world,

Sorry for my english, but i'am french.

I hope that somebody can help me.

I am novice,

I have a server OVH, with Cent OS + SolusVM Master (OpenVZ)

I have to create 2 VM, but I have never made it,
1 VM master, and 1 VM slave

I shall like of the help step by step.

Thank you for time and answers that you can bring me.

Cordially.
