semir wrote on Fri, 23 January 2015 02:45Hi,

 Yep, it lacks all the feature needed for a hosting

Thanks,
Semir

Yes, definitely not secure to offer containers to end users without the vzkernel features. If you want to look at the release history, the stable vzkernel 2.6.32 was released 10 months after RHEL6. It's only been about 7 months since RHEL7 was released.
