I always like to see iptables-save output. it is more clear for me see whole picture

However I have noticed some strange rule sequence (besides other which I'm not completely sure):
Quote:

Chain FORWARD (policy ACCEPT)

target	prot	opt	source	destination	
REJECT	all	--	anywhere	anywhere	reject-with icmp-host-prohibited
ACCEPT	all	--	10.0.0.0/24	anywhere	
ACCEPT	all	--	anywhere	10.0.0.0/24	

so basicaly as first rule you REJECT any forward policy?
