I always like to see iptables-save output. it is more clear for me see whole picture

However I have noticed some strange rule sequence (besides other which I'm not completly sure):
Quote:
Chain FORWARD (policy ACCEPT)
target   prot opt source   destination
REJECT   all -- anywhere   anywhere   reject-with icmp-host-prohibited
ACCEPT   all -- 10.0.0.0/24   anywhere
ACCEPT   all -- anywhere   10.0.0.0/24

so basicaly as first rule you REJECT any forward policy?
