Subject: Re: Kernel Panic in OpenVZ Booting Stage - CentOS boots fine
Posted by bavinci on Thu, 12 Feb 2015 19:07:38 GMT

Hello!

Thanks for raising your hand~

I could see atleast one vote saying "Yes" it is a stable platform!

Upon installing SSL on main node, OVZ Kernels could not boot, message kernel panic!

I did not have much time to play around with Hyperviser, neither support so I decided not to use Virtualization till I get support from experts ...

Any idea I can have support from any team!

Looking forward~
