Subject: Re: Unable to Create Container
Posted by curx on Thu, 27 Aug 2015 20:59:07 GMT

the default type for storing the container (ct) data is on/in a ploop device (->
https://wiki.openvz.org/Ploop/Getting_started)
and the reqirements for ploop are the filesystem on which the data is located must be formated
with ext4 or use nfsv3

btw have you any log entries found in /var/log/vzctl.log detect some kind of issue?
