found an issue:

on vzpkg create a temporary ploop image is create in directory /var/tmp - if underlaying filesystem is not an ext4 this creation failed with this error, too:

(...)

Error: Failed to create ploop image /var/tmp//vzpkg.2GEcRO/cache-private/root.hdd/root.hds:

Error in add_delta (ploop.c:1310): Can't add image

/var/tmp//vzpkg.2GEcRO/cache-private/root.hdd/root.hds: unsupported underlying filesystem 3

Error: Cannot create ploop device

(...)
