When I run `cat /proc/meminfo` on my CentOS 6.7/OpenVZ container, it is missing the "Committed_AS" line which causes the some application processes to fail.

```
[root@node1 ~]# more /etc/centos-release
CentOS release 6.7 (Final)
```

```
[root@node1 ~]# uname -a
Linux node1 2.6.32-042stab103.6 #1 SMP Wed Jan 21 13:07:39 MSK 2015 x86_64 x86_64
x86_64 GNU/Linux
```

```
[root@node1 ~]# cat /proc/meminfo
```

```
MemTotal:    25165824 kB
MemFree:     10861036 kB

```

Can any one help me how to get the "Committed_AS" value from /proc/meminfo please? Also, clarify why the output has so few lines.

Thank you.
